

miniART

PLUS *lite*

**Moving Head Wash Beam Zoom LED
7x60W RGBW**

USER MANUAL

1. Unpacking

Thanks for choosing **miniART** .For your own safety,please read this manual before installing the devices.This manual cover the important information on the installation and applications.Meanwhile please keep this manual for the future needs.

The **miniART** is made of a new type of high temperature strength of engineering plastic and cast aluminum with nice look.The fixture is designed and manufactured strictly following CE and RoHs Standards,complying with international standard DMX 512 protocol.It's available independently controlled and linkable with each other for operation.And it is applicable for large-scale live performances,theater,studio,night clubs and discos.

miniART adopts powerful 60W OSRAM RGBW LED which features high brightness and stability.Please carefully unpack it when you receive the fixture and check whether it is damaged during the transportation.And please check whether the following item are included:

Moving head-----one
Omega clamp-----two
Signal cable-----one
Power cable-----one

10.Maintenance and Cleaning

The following points have to be considered during the inspection:

- 1) All screws for installing the devices or parts of the device have to be tightly connected and must not be corroded.
- 2) There must not be any deformations on the housing, color lenses, fixations and installation spots (ceiling, suspension, trussing).
- 3) Mechanically moved parts must not show any traces of wearing and must not rotate with unbalances.
- 4) The electric power supply cables must not show any damage, material fatigue or sediments.

Further instructions depending on the installation spot and usage have to be adhered by a skilled installer and any safety problems have to be removed.

CAUTION!

Disconnect from mains before starting maintenance operation.

In order to make the lights in good condition and extend the life time, we suggest a regular cleaning to the lights.

- 1) Clean the inside and outside lens each week to avoid the weakness of the lights due to accumulation of dust.
- 2) Clean the fan each week.
- 3) A detailed electric check by approved electrical engineer each three month, make sure that the circuit contacts are in good condition, prevent the poor contact of circuit from overheating.

We recommend a frequent cleaning of the device. Please use a moist, lint-free cloth. Never use alcohol or solvents.

There are no serviceable parts inside the device. Please refer to the instructions under "Installation instructions".

Should you need any spare parts, please order genuine parts from your local dealer.

9. Specifications

OPTICS:

- Light source: 7×60W Osram RGBW LEDs, 50,000 hs.
- Color temperature: 2500-8000k adjustable

MOVEMENT:

- Extremely accurate positioning
- High-resolution stepper motors ensure extreme accuracy and smooth movements.
- Auto-positioning, pan movement: 540° (16 bit), tilt movement: 270° (16 bit)

COLORS:

- Linear RGBW, color mixing with unlimited colors, dynamic colour macro effect with variable speed
- Super uniform light beam with no colour shadows

EFFECT SECTION:

- Wash, beam effect modes, multiple macros
- 2.5°-60° Electronic Zoom angle
- Digital Wash-Beam Framing effect
- Beam edge softening control (in Wash mode)
- 0-100% linear electronic dimmer without color variation
- Adjustable speed stop/strobe effect with instantaneous blackout
- Dedicated channel for color temperature setting
- RGBW auto-tuning
- Control mode: International standard DMX512, 3-pin/5-pin DMX512
- Standard mode: 21 channels, Sound control mode, Stand-alone mode

OTHER FUNCTION:

- LED Over temperature protection
- Advanced cooling system, intelligent control of wind speed
- DMX Software update
- Show software version number
- Display LEDs and lanterns use time
- Gravitation sensor for auto screen positioning
- 100% brightness without stroboscopic problem
- Special flicker free management for HD and UHD cameras, ready for 8K and 16K
- 100% brightness without stroboscopic problem
- Manual programming function
- Manual fine calibration function

POWER SUPPLY:

- Power consumption: 500W@220V
- AC100-240V, 50/60Hz

PACKING AND DIMENSION:

- Carton size: 500*410*300MM
- Flight case size: (4in1) 790*520*620MM
- Net weight: 9KG

2. safety instructions

CAUTION!
Be careful with your operations. With a dangerous voltage you can suffer a dangerous electric shock when touching wires

This device has left the factory in perfect condition. In order to maintain this condition and to ensure a safe operation, it is absolutely necessary for the user to follow the safety instructions and warning notes written in this user manual.

If the device has been exposed to temperature changes due to environmental changes, do not switch it on immediately. The arising condensation could damage the device. Leave the device switched off until it has reached room temperature.

This device falls under protection-class I. Therefore it is essential that the device be earthed.

The electric connection must carry out by qualified person.

The device shall only be used with rate voltage and frequency.

Make sure that the available voltage is not higher than stated at the end of this manual.

Make sure the power cord is never crimped or damaged by sharp edges. If this would be the case, replacement of the cable must be done by an authorized dealer.

Always disconnect from the mains, when the device is not in use or before cleaning it. Only handle the power cord by the plug. Never pull out the plug by tugging the power cord.

During initial start-up some smoke or smell may arise. This is a normal process and does not necessarily mean that the device is defective, it should decrease gradually.

Please don't project the beam onto combustible substances.

Fixtures cannot be installed on combustible substances, keep more than 50cm distance with wall for smooth air flow, so there should be no shelter for fans and ventilation for heat radiation.

If the external flexible cable or cord of this luminaire is damaged, it shall be exclusively replaced by the manufacturer or his service agent or a similar qualified person in order to avoid a hazard.

3. Operation Instructions

- The moving head is for beam effect for onsite decoration purpose.
- Don't turn on the fixture if it's been through severe temperature difference like after transportation because it might damage the light due to the environment changes. So make sure to operate the fixture until it is in normal temperature.
- This light should be keep away from strong shaking during any transportation or movement.
- Don't pull up the light by only the head, or it might cause damages to the mechanical parts.
- Don't expose the fixture in overheat. moisture or environment with too much dust when installing it. And don't lay any power cables on the floor. Or it might cause electronic shock to the people.
- Make sure the installation place is in good safely condition before installing the fixture.
- Make sure to put the safety chain and check whether the screws are screwed properly when installing the fixture.
- Make sure the lens are in good condition. It's recommended to replace the units if there are any damages or severe scratch.
- Make sure the fixture is operated by qualified personnel who knows the fixture before using-
- Keep the original packages if any second shipment is needed.
- Don't try to change the fixtures without arty instruction by the manufacturer or the appointed repairing agencies.
- It is not in warranty range if there are any malfunctions from not following the user manual to operate or any illegal operation, like shock short circuit, electronic shock, lamp broke, etc.

4. Mounting and Installation

Cautions: For added protection mount the fixtures in areas outside walking paths, seating areas or in areas were the fixture might be reached by unauthorized personnel.

Before mounting the fixture to any surface, make sure that the installation area can hold a minimum point load of 10 times the device's weight.

Fixture installation must always be secured with a secondary safety attachment, such as an appropriate safety cable.

Never stand directly below the device when mounting, removing, or servicing the fixture.

8. Control Channels

21 Channels:

Channel	Function	DMX value	Feacture
1	Red		
2	Red fine		
3	Green		
4	Green fine		
5	Blue		
6	Blue fine		
7	White		
8	White fine		
9	Color temperature		
10	Color marco		
11	Strobe		
12	Dimmer		
13	Dimmer fine		
14	Pan		
15	Pan fine		
16	Tilt		
17	Tilt fine		
18	Full dimmer speed		
19	Reset		
20	Zoom		
21	Reserved		

7.Menu for Control Display

	PROJECT		INSTRUCTION FOR USE

from a ceiling, or set on a flat level surface (see illustration below). Be sure this fixture is kept at least 0.5m (1.5 ft) away from any flammable materials (decoration etc.).

Always use and install the supplied safety cable as a safety measure to prevent accidental damage and/or injury in the event the clamp fails.

Mounting points: Overhead mounting requires extensive experience, including amongst others calculating working load limits, a fine knowledge of the installation material being used, and periodic safety inspection of all installation material and the fixture. If you lack these qualifications, do not attempt the installation yourself. Improper installation can result in bodily injury.

Be sure to complete all rigging and installation procedures before connecting the main power cord to the appropriate wall outlet.

Clamp Mounting: miniART provides a unique mounting bracket assembly that integrates the bottom of the base, the included "Omega Bracket," and the safety cable rigging point in one unit (see the illustration below). When mounting this fixture to truss be sure to secure an appropriately rated clamp to the included omega bracket using a M10 screw fitted through the center hole of the "omega bracket". As an added safety measure be sure to attached at least one properly rate the base asse

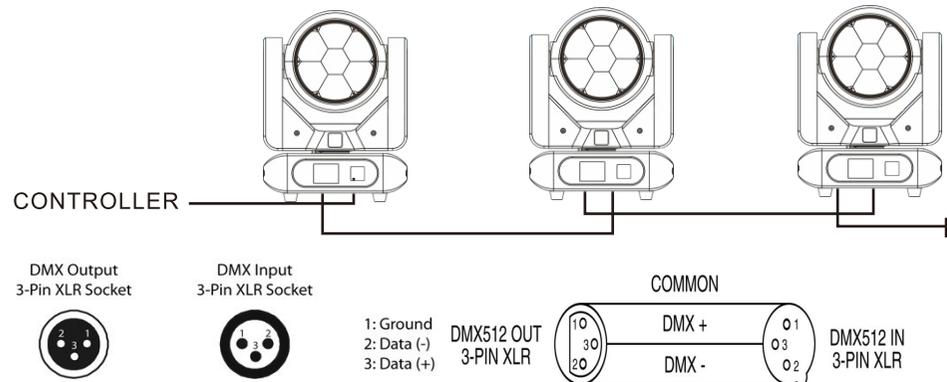

Regardless of the rigging option you choose for your LED Spot, always be sure to secure your fixture with a safety cable. The fixture provides a built-in rigging point for a safety cable on the hanging bracket as illustrated above. Be sure to only use the designated rigging point for the safety cable and never secure a safety cable to a carrying handle.

5. DMX-512 control connections

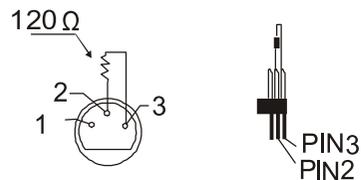

Connect the provided XLR cable to the female 3-pin XLR output of your controller and the other side to the male 3 pin XLR input of the moving head. You can chain multiple

Moving head together through serial linking. The cable needed should be two core, screened cable with XLR input and output connectors. Please refer to diagram below.

DMX-512 connection with DMX terminator

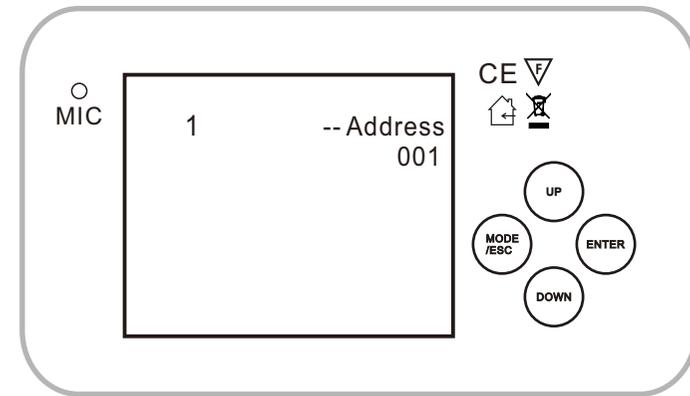

For installations where the DMX cable has to run a long distance or is in an electrically noisy environment, such as in a discotheque, it is recommended to use a DMX terminator. This helps in preventing corruption of the digital control signal by electrical noise. The DMX terminator is simply an XLR plug with a 120 Ω resistor connected between pins 2 and 3, which is then plugged into the output XLR socket of the last fixture in the chain. Please see illustrations below.

That Control Display

6. Top menu, present the current operation:

2. Press the <UP> or <DOWN> button repeatedly until you reach the desired menu function. Press the <ENTER> button to select the menu function currently displayed, or to enable menu option. To return to the previous option or menu without changing the value. Press the <MODE/ESC> button.
