About Us

Piu'39 is an Italian company that proposes itself in the distribution market in 2019, from the division of a company branch that already in 2013 was consolidated in the sector, by experience gained in the world of entertainment and design, supply, distribution, commissioning work and assistance of professional equipment dedicated to the audio, video, lighting, accessories and integrated systems sectors, in the Show Business, Entertainment and Building sector.

The company after having included in its product range the exclusive distribution and partnership in Italy of renowned, prestigious and ambitious brands in continuous evolution has decided to start an innovative project where assistance, solutions, creativity, quality and sharing will be the imprinting and the "must" of the corporate, where the purchase of a product will no longer be just a necessity or a commercial operation, but an added value with the aim of creating an integrated system of services and technologies always at the forefront, which connects companies across Europe in the showbusiness and entertainment industry.

The irreplaceable strength of our company is the continuous comparison in synergy with our designers and our customers who are constantly assisted and advised in choosing the best products to be used for the realization of lighting projects, home automation systems and imaginative audio-visual and all 'vanguard.

Our Mission is the continuous commitment to offer our know-how and our products of the highest quality and the most fashionable in the world, offering a complete service in all its phases: consulting, design, installation, and after-sales service. We believe and invest daily in the development of the company with humility and dedication, strong skills and work experience gained in the field.

Piu'39 is positioned in the market as a young company but with experience in the design and exclusive supply of integrated solutions Audio, Video, Lights, Domotic & socket design for the realization of new residential and commercial projects in the area of design, retail, supplies, showbusiness and entertainment.

Strengthened by a consolidated experience over the years we are pleased to offer our customers a wide range of services related to this sector taking care of the relationship with the customer from the design phase up to the implementation stages, having in our staff a technical department of proven professionalism.

About Projects

The experience gained in the field of design/distribution in the field and the know-how acquired allows a rapid development of the company since its foundation, which in a few years has established itself in the territory thanks to its innovation as a privileged partner of public bodies, private organizations and companies in the implementation of large turnkey projects, and dealers, providing the necessary advice by supporting the customer in the design phase, and taking care, where necessary, of the technical / operational part for the insertion of products audio, video, lighting and integrated systems.

At all times we ensure constant support, a team of professionals able to calibrate the proposals, improving or changing them in agreement with customers based on communication and budget objectives. The creativity and intelligence of our designers allow ideas to take shape. Using the best technology, floor plans are studied and, in case of necessity, 3D renderings are developed that allow an overall view of your project at 360 degrees. An internal organization that is flexible and reliable, able to comply in all circumstances with the times of realization and delivery requested by the customers, recreating the ideal location for each project.

Piu39 is equipped with a staff of qualified designers and solid experience in the field, we offer tailor-made design solutions while working with external professionals who find in us a qualified and reliable partner for the execution of their ideas.

The company team puts at the service of each client a highly specialized operating structure and a group of professionals and consultants for the logistical technical support linked to the customer's needs. We support the customer in every step by taking care of the technical direction of your project, relieving you from any responsibilities and concerns that involve the creation and management of your project.

About Products

Piu39 is a guarantee of innovation for customers who want unconventional solutions with a strong personality . Video , lights and audio are excellent communication tools that can be applied to a variety of situations and that have the power to change the vision of your business.

Our passion and dedication for audio / visual technologies translates into assistance , partnerships and distribution of renowned brands in the audio visual sector, becoming a reference point as professional solutions to the specific needs of audio video rental companies and musical instrument shops, designers , builders and system integrators.

The strategic vision is based on a "customer oriented " model aimed at earning and maintaining customer trust and loyalty through a complete service, business diversification, consolidated market positioning, which become guiding values and objectives for the company . to be pursued to strengthen its presence in the national and foreign market.
